Carruthers Pass Update

The Company has terminated the Carruthers Pass Option Agreement with Cariboo Rose Resources, resulting in Cariboo Rose retaining 100% of the project. While the exploration potential for volcanogenic massive sulphide base metal deposits on the project remains high, it is not core to Vizsla Copper's current strategy of exploration and development of porphyry-related copper-gold deposits.

Copper Pit Acquisition Update

The Company has received approval from the TSX Venture Exchange for the Purchase Agreement entered into with Michael Langille (the "**Vendor**"), previously announced on February 21, 2024. Vizsla Copper has issued 100,000 common shares (the "**Consideration Shares**") to purchase two mineral claims totalling 59.5 ha, free and clear of any encumbrances. The Consideration Shares will be subject to a four-month hold period pursuant to applicable Canadian securities laws, after which 25% of the Consideration Shares will become free trading. In addition, the Vendor has agreed to voluntary resale restrictions whereby an additional 25% of the Consideration Shares will become free trading every four months thereafter.
